Senior Two Chemistry Revision Notes

Sample revision handout for the District Learning Hub prototype.

1. Matter is anything that has mass and occupies space.

2. Elements contain one type of atom; compounds contain two or more elements chemically combined.

3. A physical change does not produce a new substance.

4. A chemical change produces one or more new substances.

Revision activity: Give two examples each of physical and chemical changes.

Note: Replace this sample with teacher-approved Senior Two notes.
